PROFILE

A final-year B.Tech student focuses on securing job placements or pursuing higher studies while enhancing technical skills through projects and internships. This pivotal time involves navigating placement pressures and personal growth as they transition into professional careers.

PROFESSIONAL EXPERIENCE

YHiils, Traniee
August 2024 – December 2024
Java and Full-Stack Web Development
- Currently enhancing my skills in Java and full-stack web development, focusing on both front-end and backend technologies
- Developed and executed marketing strategies to enhance brand visibility and drive customer engagement.

Novem Controls pvt, Traniee
July 2023 – September 2023
Python Coder
- Collaborated with senior developers on a web application using Django.
- Participated in code reviews and pair programming to enhance coding skills.
- Assisted in writing unit tests and implementing test-driven development (TDD).

EDUCATION

B.Tech (C.S.E), Kurukshetra University
August 2021 – present

XII (High School), Army School
2019 – 2021

PROJECTS

Movie Website Development, Front-End Developer
Developed a dynamic movie website during my second year using HTML and CSS for a responsive layout, featuring user-friendly navigation, and integration of movie details such as ratings, reviews, and trailers, all optimized for various devices.

Weather Application Development,
Java and Kotlin Developer
I created a weather application using Java and Kotlin that provides real-time updates and forecasts, integrating location-based information for automatic user detection and offering a 15-day forecast with manual search functionality for any location.

Telegram chat bot
Developed an advanced modular Telegram bot featuring AI API integration, premium user management, Discord connectivity, Google Drive uploads, and optimized performance. Designed scalable services, custom handlers, and comprehensive logging for maintainability and reliability.
